

“Borg Fleet gives me a comprehensive tool to control my fleet,

track my inventory, work orders, personnel and more. To me this is the biggest bargain available to our industry today!” **Robert Spooner, Director of Maintenance, Hecor, Inc.**

Complete Platform Solutions for Fleet Management

Built by fleet owners for fleet owners, Borg Fleet is designed to accommodate all types of different movable assets, including heavy equipment and vehicles for a wide range of industries. Borg Fleet’s design also incorporates a user-friendly and intuitive interface that enables easy adoption even by users unfamiliar with computers.

With Borg Fleet, companies can eliminate guesswork, reduce asset downtime and provide truly beneficial action items based on timely data. The result can be optimum performance for every vehicle regardless of make, model or age.

A global view of the fleet

Borg Fleet utilizes GPS tracking along with user-defined tasks to manage an entire fleet from any Internet-connected computer. Users can locate the position of any vehicle while also checking on any upcoming maintenance required for that vehicle.

When maintenance is due, users can easily schedule the job via a work order, then ensure that parts are available and assign a mechanic. Borg Fleet even assists with parts reordering. Through the reporting feature, users can also track labor costs, parts usage and other expenses associated with a given vehicle, vehicle type or other groupings.

With Borg Fleet, users gain a global, fully integrated view of all activities occurring between the field and home operations. The result is a powerful, single point of access to all crucial fleet information, helping to drive down costs while increasing efficiency, productivity and ROI on vehicles and equipment.

Your benefits with Borg Fleet:

Savings up to \$1,300 per vehicle through reduced maintenance expense, improved inventory management, increased fleet uptime and utilization, and accurate Total Cost of Ownership (TCO) tracking.*

A fully hosted SaaS product, with automatic upgrades, no new hardware or software to install, and secure access from any computer connected to the Internet.

Increased productivity through an extremely easy-to-learn, easy-to-use interface.

Improved job costing based on accurate forecasting of operational expenses.

Optimized asset disposition, with depreciation alerts so that each vehicle can be replaced at the right time for maximum return on investment (ROI).

Theft control through the ability to erect a variable, 24/7 electronic geofence around company equipment.

Increased equipment resale value by up to 20%, based on complete maintenance history on vehicles and equipment.

Outstanding service, with each request handled by a trained professional to ensure the maximum in customer service, whether the request is received by phone or email.

* Based on recent reports from actual customers.

With Borg Fleet from BorgSolutions companies, can turn what is usually a cost into continuous cost-savings across the entire fleet, for the entire life of their fleet.

Designed for the construction, government, rental and fleet services industries, Borg Fleet is a modular, easy-to-use fleet intelligence platform for tracking and management.

Borg Fleet is available as an ASP offering. This means that customers don't have to purchase an application. Instead, they receive Borg Fleet services for a fee that covers upgrades, data storage, and secure access from any computer connected to the Internet.

With Borg Fleet, companies can streamline maintenance, improve inventory management, reduce theft, manage employee productivity and maximize ROI on a continuous, predictable basis.

Powerful, easy-to-use features

Borg Fleet provides a powerful range of features that can be easily used by field personnel, service technicians, administrators, managers and fleet owners.
