

“Borg Fleet was incredibly easy to learn.

Even employees who had little or no experience with computers were up and running in no time.”

Juan Somosa, President, MacroMix, Inc.

Fleet Intelligence Platform Solutions

With Borg Fleet from BorgSolutions, companies can turn what is usually a cost into continuous cost-savings across the entire fleet, for the entire life of their fleet.

Total cost control for today's fleets — that's what BorgSolutions offers with Borg Fleet™, a modular, easy-to-use fleet intelligence platform for tracking and management.

Designed for the construction, government, rental and fleet services industries, Borg Fleet solutions can help streamline maintenance, improve inventory management, reduce theft, manage employee productivity and maximize return on investment (ROI) on a continuous, predictable basis.

Track Assets from Any Location

Borg Fleet combines GPS tracking with user-defined capabilities to manage an entire fleet from any Internet-connected computer. Users can locate the position of any vehicle while also checking on upcoming maintenance required for that vehicle.

Automate Your Maintenance

When maintenance is due, users can easily schedule the job via a work order, then ensure that parts are available and assign a mechanic. Borg Fleet even assists with parts reordering. Through the reporting feature, users can also track labor costs, parts usage and other expenses associated with a given vehicle, vehicle type or other groupings.

Take advantage of a true SaaS product

Borg Fleet is a fully hosted, web-based SaaS product. This means that customers don't have to purchase an application. Instead, they receive Borg Fleet software services for a monthly fee that covers upgrades, data storage, and secure access from any computer connected to the Internet.

The SaaS approach eliminates the burden of third-party software costs associated with in-house software administration. In addition, Borg Fleet requires no new hardware and is customizable to a company's specific requirements.

Save up to \$1,300 per vehicle

The savings add up fast with Borg Fleet, based on reduced maintenance expense, improved inventory management, increased fleet uptime and utilization, and accurate Total Cost of Ownership (TCO) tracking.*

Spend as little as \$5 per month

As an SaaS offering, Borg Fleet software services, updates and data storage fees are all incorporated into a regular, monthly fee. Borg Fleet's pricing model is based per user versus per unit or asset, and it also incorporates our renowned customer service as part of its fee.

Use the devices that fit your needs

Borg Fleet supports a wide range of telematic hardware devices, like GPS, for both on-road vehicles and off-road heavy equipment. Options are also available for cellular, satellite or WiFi-based communications.

More Benefits with Borg Fleet

With Borg Fleet, users have a global view of all activities occurring between inventory, work orders, purchase orders, and mechanical staff, enabling a powerful, single point of access to all crucial fleet information.

The powerful information reach and integration delivered by Borg Fleet results in a wide range of business-critical benefits, including —

Increased productivity through an extremely easy-to-learn, easy-to-use interface solution. In fact, many users find that they can start using Borg Fleet within minutes.

Improved job costing based on accurate forecasting of operational expenses.

Optimized asset disposition, with depreciation alerts so that each vehicle can be replaced at the right time for maximum ROI.

Stronger theft control through the ability to erect a variable electronic geofence around company equipment. Movement outside or into this perimeter triggers an instant critical alert sent by pager or email for immediate manager review.

Increased equipment resale value by up to 20%, based on complete maintenance history on vehicles and equipment.*

Multi-language support, including interfaces available in English, Spanish, French, German and other languages.

Outstanding service, with each request handled by a trained professional to ensure the maximum in customer service, whether the request is received by phone or email. In addition, each new customer is trained by our staff via the web or in person, depending on the customer's needs or requirements.

* According to a survey of Borg Fleet customers.
